

## Materials List

- 600 to 700 lbs. of flat stone
- Three 5-gallon buckets of crushed stone
- Two 60-lb. bags of sand
- Five 3- or 4-ft. lengths of 1/2-in. rebar
- Two 8 x 8 x 16-in. concrete blocks
- Pond liner (*depending on the size of your reservoir*)
- Ten 1/2-in. copper plumbing straps
- 12 corrosion-resistant 3-in. screws
- 20 corrosion-resistant 1-1/2-in. screws
- Two 2x8s, 8 ft. or longer  
(*depending on the size of your reservoir*)
- Water feature pump (*see "Buying the Pump," p. 35*)
- Three or 4 ft. of plastic tubing—match the tubing size to the outlet on your pump
- One small stainless steel band clamp
- One or two blocks of duct seal putty—you'll usually find this in the electrical department.
